

## **My Summer Vacation**

During the summer vacation, my parents and I went to Hunan to visit my uncle.

At my uncle's house, I went to the rice fields and saw that the rice plants reached maturity and the grains changed from green to yellow. I played in the irrigation ditch and I felt very cool water. I also discovered many unknown insects in the fields. They were red, green, black and yellow. Some had hard shells, while others only had soft bodies.
